

RKBN_2017-07_FSD

Rokubun, an R&D performing company, is looking for a candidate to join us in the pursue of a breakthrough in navigation solutions, and to participate in the growth of a technology creative start-up. Are you bold enough to jump in this challenging ride?!

Job Title:

Full Stack Developer

Main duties will be:

- **Front-end** development of Rokubun's Software-as-a-Service (SaaS).
- **Back-end** development of Rokubun's SaaS and interface with Rokubun Core GNSS processing algorithms.
- Front-end development for Argonaut **web-based interface**

Key requirements:

- For the front-end part: **HTML5 / CSS3** and Javascript (AngulaJS, React, Vue.js, ...)
- For the back-end part: **NodeJS, Python, PHP**.
- Familiar with the usage of **npm** and build tools (Grunt, Gulp...)
- Familiar with databases, SQL or NoSQL
- The candidate must be familiar with **interfacing processes** between two remote machines.
- Familiar with **Python** programming language
- Software version control: **GIT**
- Web-service **deployment** in servers.
- Good command in English (orally and written)

Additional Skills (covering any of these points will be considered a plus):

- Knowledge of Processing.
- Modern JS Stack
- Familiar with Nging or proxy technologies.
- Knowledge of SOLID coding standars and Clean Code
- Documentation tools (Python's Sphinx, ...)
- Interest in navigation technologies (GPS) will be considered a plus

Qualities:

- Cleanliness and paramount organization when programming.
- Passionate, self motivated and well organized
- Proactive at work and generator of ideas. Raise your voice, we value good ideas.
- Good communication and presentation skills
- Team player and self-driven worker

Providing at least two references for your candidacy will be much appreciated.

Candidates can send applications at rokubun@rokubun.cat. Please specify **RKBN_2017-07_FSD** in your e-mail subject.
